DETAILED ACTION

Response to Arguments

The applicant's amendment filed 1-19-05 overcomes the examiner's prior art rejection. **Hence claims 1-14 and 20-30 allowed.**

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. The applicant has amended per the examiner's recommendation (eg. amending the independent claims with claims 18 and 30 or 15). The examiner notes that allowed claim 5 did not require the limitations from claim 18 since it previously disclosed sending a qualification directive to a switch/MSC.
2. The examiner believes the claims to be novel, in his opinion, since they recite highly specific designs not found in the prior art of record.
3. Regarding each independent claim -- Sonti teaches that a subscriber can dial a profile service number to request a profile change, the base station passes the dialed digits to the mobile switching center which then sends a "FEATREQ" message to the Home Location Register. The Home Location Register then sends the profile update to the Switching Center. Thus, in contrast to claim 1, Sonti does not teach or suggest sending a qualification directive to the Switching Center without receiving a request from any Switching Center.
4. Larkins fails to remedy these failings, as does Duran, hence the claims are allowed -- Larkins teaches processes and systems to enable a radiotelephone

Art Unit: 2683

subscriber to set up services with a service provider. The radiotelephone, programmed by the subscriber, transmits a temporary directory number to the mobile switching center. The MSC then accesses an over-the-air center to obtain the subscriber profile, which then sends the profile. As the MSC makes a request for the subscriber profile, Larkins fails to teach or suggest the recitation of claim 1 of "without any prompting from any switching center" sending an update to the subscriber profile. Further, Duran is directed towards a system and method for temporarily relocating a subscriber to a new location, such as another telephone. Unlike claim 1, Duran does not make any mention of updating a subscriber profile. Hence, Duran also does not teach or suggest sending a profile update in response to a request generated in response to an update regarding a change in a subscriber profile, without any prompting by a Switching Center..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
